DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,6-8,10-11,13-18,20,21,23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Picard et al (6,359,251).

Note column 13 paragraph 3 in Picard et al which teaches volume control via pressure sensing feedback via volume flow control PFC valve, as acclaimed. Picard et al teach multiple gases as claimed via PFC controllers, as per claim 2.

Response to Arguments

Applicant's arguments filed 01-09-2007 have been fully considered but they are not persuasive. The claim rejection states that the Picard et al patent teaches proportional flow control valves and uses pressure sensing to control these valves. Barring further description of the same in the claims, the pressure sensing in Picard et al does produce a current which controls the valves and it is submitted that the opening and closing of these valves does control the total volume of gas passing through these

valves, thus meeting the present claim limitations. The operation of these valves does control the total volume of gas through the torch , also. Applicants claims do not define volume flow control relative to pressure flow control and barring further description of the same in the claim limitations, the pressures sensing of Picard et al and the subsequent regulation of the flow valves would clearly lead to control of the volume and the total volume of gas passing through the torch, using one gas.

Allowable Subject Matter

Claims 5,9,12,19,22-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
